¹Dual credits are the number of credit hours accumulated by high school students that are taking a college level class through their local high school and are acquiring both high school and college credits for the class. Dual enrolled credits are college level credits accumulated by high school students who are taking a college level class for college credits only.

²Tuition and fee saving calculations are based on the cost of tuition and fees at Lake Land Collge for the reporting year indicated. For example, the tuition and fee savings in this table is based on the cost of tuition and fees per credit hour for the reported academic year.

¹Represents the number of students who graduate from Lake Land College within 3 years of enrolling AFTER high school graduation. For example, this number represents the number of students who graduated from high school in the year indicated and within three years from Lake Land College. In addition, students may have received multiple degrees. For example, a student may receive an AAS and one or more certificates as well. As a result, the number of degrees may exceed the the total number of students who graduated.

²These students are not necessarily graduates of Lake Land College. However, they did attend LLC for at least one semester before transferring to a four year university/college. Due to the data available on all high school students within the district, LLC is only able to report on the non dual credit students who actually attend LLC for at least one term.
