MAJOR COURSE SEGMENT	HOURS	LEARNING OUTCOMES
		<i>The student will be able to:</i>
Leadership and professionalism	12	1. Summarize ethical and professional principles as applied to nursing and health care. 2. Design a professional resume. 3. Critique similarities and differences in the curriculum of the LPN/LVN, ADN, diploma, BSN, MSN and PhD nursing programs. 4. Demonstrate appropriate medication administration techniques. 5. Demonstrate appropriate use of informatics and technology in the clinical setting and simulation.
Immunity, inflammation and infection	12	1. Demonstrate assessment of the client with altered immunity. 2. Interpret diagnostics in planning care for clients with various inflammatory conditions. 3. Distinguish between illness conditions of altered immunity, inflammation and infection. 4. Develop nursing interventions related to altered immunity, inflammation and infection.

Gas exchange	24	<ol style="list-style-type: none"> 1. Prepare the care of clients undergoing diagnostic test to evaluate oxygenation. 2. Compare the nursing assessment and interventions indicated for a client with varying oxygenation issues. 3. Demonstrate oropharyngeal and deep suctioning to promote gas exchange. 4. Collaborate with a respiratory therapist in addressing the concept of gas exchange.
Perfusion	24	<ol style="list-style-type: none"> 1. Compare nursing assessment and interventions for a client with angina vs. myocardial infarction. 2. Plan the preparation and care of clients undergoing cardiac diagnostic tests. 3. Distinguish between assessment findings for chronic and acute arterial and venous disorders. 4. Organize methods of cardiovascular health promotion in the community.
Clotting	24	<ol style="list-style-type: none"> 1. Organize the components of the hematologic system and describe their role in oxygenation and hemostasis. 2. Plan nursing care for clients undergoing common therapeutic measures for disorders of the hematologic system. 3. Assess specific anatomic and physiologic factors that affect the vascular system and tissue oxygenation. 4. Organize nursing care related to tests and procedures used to diagnose selected vascular disorders. 5. Construct a plan of nursing care for clients with selected vascular disorders.
96		

Outcomes*	At the successful completion of this course, students will be able to:
Course Outcome 1	Perform appropriate communication strategies to enhance client care and interprofessional collaboration.
Course Outcome 2	Construct nursing care plans to plan care for clients with a variety of healthcare situations.
Course Outcome 3	Demonstrate ethical and professional behaviors in the academic and clinical settings.
Course Outcome 4	Demonstrate comprehensive knowledge of nursing science while making clinical judgments.
Course Outcome 5	Perform selected nursing skills safely and accurately.
Course Outcome 6	Manage informatics and technology in the academic and clinical settings.
Primary Laker Learning Competency	Critical Thinking: Students connect knowledge from various disciplines to formulate logical conclusions.
Secondary Laker Learning Competency	Professional Skills & Ethics: Students demonstrate professional skills and ethical accountability.

*Course and program outcomes will be used in the software for outcomes assessment and should include at least 1 primary and 1 secondary Laker Learning Competency. Limit to 3-5.
