Family law 3 2 1. Define, pronounce and spell the legal terms associated with family law, using them in logal context. 2 2. Identify the procedure of the court system including procedure. Business organizations and bankruptty 2 2 1. Define, promounce and spell the logal trums including the procedure of the court system including procedure. 1. Define, promounce and spell the logal trums including basics are special and the system of the body. 1. Identify the procedures of the court system who impossible properties in the procedure of the court system including basics are special and the system of the body. 1. Identify and describe the major functions and structures of the digestive system of the body. 1. Identify and describe the major function and structures of the court system of the body. 1. Identify and describe the major function and structures of the interval properties of the body. 1. Identify and describe the major function and structures of the interval properties of the body. 1. Identify and describe the major function and structures of the interval properties of the body. 2. Define, pronounce and spell the primary terms related to the union properties of the body. 2. Define, pronounce and spell the primary terms related to the union properties of the body. 2. Define, pronounce and spell the primary terms related to the union properties of the body. 2. Define, pronounce and spell the primary terms related to the union properties of the body. 2. Define, pronounce and spell the primary terms related to the special senses of the			
Business organizations and bankruptcy 2	Family law	3	associated with family law, using them in legal context. 2. Identify the procedures of the court system involving marriage, divorce, dissolution of marriage, and divorce
The digestive system 4 2. Define, pronounce and spell the primary terms related to the digestive system of the body. The urinary system 4 4 3. Identify and describe the major functions and structures of the urinary system of the body. 2. Define, pronounce and spell the primary terms related to the urinary system of the body. 2. Define, pronounce and spell the primary terms related to the urinary system of the body. The nervous system and mental health 4 3. Identify and describe the major functions and structures of the nervous system of the body. 2. Define, pronounce and spell the primary terms related to the nervous system of the body. 3. Define, pronounce and spell the primary terms related to the nervous system of the body. 4 3. Identify and describe the major functions and structures of the special senses of the eyes and ears. 4 4 3. Define, pronounce and spell the primary terms related to the special senses of the eyes and ears. 5 pecial senses: the eyes and ears 4 4 3. Define, pronounce and spell the primary terms related to the special senses of the eyes and ears. 5 pecial senses: the eyes and ears. 4 3. Identify and describe the major functions and structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce a	Business organizations and bankruptcy	2	involving business organizations. 2. Identify the procedures of the court systems involving business organizations such as sole proprietorship, partnership, and corporation as well as the goals of bankruptcy code and the types of
The urinary system 4 2. Define, pronounce and spell the primary terms related to the urinary system of the body. 2. Define, pronounce and spell the primary terms related to the urinary system of the body. 3. I. Identify and describe the major functions and structures of the nervous system of the body. 2. Define, pronounce and spell the primary terms related to the nervous system of the body. 3. Define, pronounce and spell the primary terms related to the nervous system of the body. 4. I. Identify and describe the major functions and structures of the special senses of the eyes and ears. 4. I. Define, pronounce and spell the primary terms related to the special senses of the eyes and ears. 4. I. Identify and describe the major functions and structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the special senses of the eyes and ears. 4. I. Identify and describe the major functions and structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the integumentary system of the body. 3. I. Identify and describe the major functions and structures of the integumentary system of the body. 4. I. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine systems of the body. 2. Define, pronounce and spell the primary terms related to the endocrine systems of the body. 3. Describe the vital signs recorded for most patients. 3. Describe the vital signs recorded for most patients. 3. Describe the vital signs recorded for most patients. 3. Describe the vital signs recorded for most patients. 3. Describe the vital signs recorded for most patients. 3. Describe the vital signs recorded for most patients.	The digestive system	4	structures of the digestive system of the body. 2. Define, pronounce and spell the primary terms
The nervous system and mental health 4 structures of the nervous system of the body. 2 Define, pronounce and spell the primary terms related to the nervous system of the body. 3 I. Identify and describe the major functions and structures of the special senses of the eyes and ears. 2 Define, pronounce and spell the primary terms related to the special senses of the eyes and ears. 3 I. Identify and describe the major functions and structures of the special senses of the eyes and ears. 4 I. Identify and describe the major functions and structures of the integumentary system of the body. 2 Define, pronounce and spell the primary terms related to the integumentary system of the body. 2 Define, pronounce and spell the primary terms related to the endocrine system of the body. 3 Define, pronounce and spell the primary terms related to the endocrine system of the body. 4 I. Identify and describe the major functions and structures of the endocrine system of the body. 2 Define, pronounce and spell the primary terms related to the endocrine system of the body. 2 Define, pronounce and spell the primary terms related to the endocrine system of the body. 3 Describe the major functions and structures of the reproductive systems of the body. 4 Describe the major functions and structures of the reproductive systems of the body. 5 Define, pronounce and spell the primary terms related to the reproductive systems of the body. 6 Define, pronounce and spell the primary terms related to the reproductive systems of the body. 7 Define, pronounce and spell the primary terms related to the reproductive systems of the body. 8 Define, pronounce and spell the primary terms related to the reproductive systems of the body. 9 Define, pronounce and spell the primary terms related to the reproductive systems of the body. 1 Describe the wital signs recorded for most patients. 2 Define, pronounce and spell the primary terms related to the reproductive systems of the body. 1 Describe the vital signs recorded for most patients.	The urinary system	4	structures of the urinary system of the body. 2. Define, pronounce and spell the primary terms
Special senses: the eyes and ears 4 structures of the special senses of the eyes and ears. 2. Define, pronounce and spell the primary terms related to the special senses of the eyes and ears. 1. Identify and describe the major functions and structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the integumentary system of the body. The endocrine system 4 1. Identify and describe the major functions and structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 3. Describe the vital signs recorded for most patients. 3. Describe the vital signs recorded for most patients. 3. Describe the uses of nuclear medicine in diagnostic treatment.	The nervous system and mental health	4	structures of the nervous system of the body. 2. Define, pronounce and spell the primary terms
The integumentary system 4 structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms related to the integumentary system of the body. 1. Identify and describe the major functions and structures of the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 3. Define, pronounce and spell the primary terms related to the endocrine system of the body. 4. Identify and describe the major functions and structures of the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 4. Describe the vital signs recorded for most patients. 2. Define, spell and pronounce the primary terms associated with basic examination procedures and positions. 3. Describe the uses of nuclear medicine in diagnostic treatment.	Special senses: the eyes and ears	4	structures of the special senses of the eyes and ears. 2. Define, pronounce and spell the primary terms
The endocrine system 4 structures of the endocrine system of the body. 2. Define, pronounce and spell the primary terms related to the endocrine system of the body. 1. Identify and describe the major functions and structures of the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 1. Describe the vital signs recorded for most patients. 2. Define, spell and pronounce the primary terms associated with basic examination procedures and positions. 3. Describe the uses of nuclear medicine in diagnostic treatment.	The integumentary system	4	structures of the integumentary system of the body. 2. Define, pronounce and spell the primary terms
The reproductive system 4 structures of the reproductive systems of the body. 2. Define, pronounce and spell the primary terms related to the reproductive systems of the body. 1. Describe the vital signs recorded for most patients. 2. Define, spell and pronounce the primary terms associated with basic examination procedures and positions. 3. Describe the uses of nuclear medicine in diagnostic treatment.	The endocrine system	4	structures of the endocrine system of the body. 2. Define, pronounce and spell the primary terms
Diagnostic procedures and pharmacology 4 2. Define, spell and pronounce the primary terms associated with basic examination procedures and positions. 3. Describe the uses of nuclear medicine in diagnostic treatment.	The reproductive system	4	structures of the reproductive systems of the body. 2. Define, pronounce and spell the primary terms
45	Diagnostic procedures and pharmacology	4	Define, spell and pronounce the primary terms associated with basic examination procedures and positions. Describe the uses of nuclear medicine in diagnostic.
