TITLE:	Blueprint Reading for Industry
AUTHOR:	W.C. Brown
PUBLISHER:	Goodheart-Willcox
VOLUME/EDITION/URL:	11th
COPYRIGHT DATE:	2022

MAJOR COURSE SEGMENT	HOURS	LEARNING OUTCOMES
		<i>The student will be able to:</i>
Introduction	1	1. Use outlines as discernible shapes of solids. 2. Draw sharp, clear, dark uniform lines, letter 1/8" tall vertical upper case.
Drafting and blueprint reading procedures	14	1. Use standard location of orthographic views to fill in missing lines and locate points and planes. 2. Interpret numbers as dimensions. 3. Use standard names of lines. 4. Interpret auxiliary, sectional and pictorial views. 5. Differentiate between detail and assembly drawings. 6. Interpret thread specifications and machine process call outs.
Title block, materials list and notes	4	1. Interpret drawing numbers and sizes; use tolerances. 2. Translate "notes" on drawings. 3. Conceptualize the make-up of material and parts lists.
Machining specifications and call outs	7	1. Depending on their major, read blueprints regarding gears, NC, welding and instrumentation and control.

Reading specialized prints	6	1. Continue the above specialized activities plus general advanced blueprints.
	32	

Outcomes*	At the successful completion of this course, students will be able to:
Course Outcome	Summarize the terms and the role of industrial prints.
Course Outcome	Demonstrate different views used in blueprints.
Course Outcome	Demonstrate different tolerances and interpretation techniques used in industry.
Primary Laker Learning Competency	Communication: Students communicate through the exchange of information.
Secondary Laker Learning Competency	Scientific Literacy: Students apply the scientific process to real-life situations.

*Course and program outcomes will be used in the software for outcomes assessment and should include at least 1 primary and 1 secondary Laker Learning Competency. Limit to 3-5.
