

LLC FACT SHEET: Complete College America: Credit Hour Completion

Spring 2015

Complete College America defines “Course Completion” as the proportion of credit hours completed by students. For these analyses, both completed and attempted hours include developmental/remedial credit hours and exclude credit hours from which students withdrew. ICCB provides data to the CCA for all community colleges in Illinois and provides an Illinois comparison group of community colleges. Lake Land’s comparison group includes IL Eastern CC, Illinois Valley, Kankakee, Lewis and Clark, John Logan, and McHenry.

- ❖ On average over the three reporting years, the average full time community college student in Illinois tends to complete around 86% of the credit hours attempted and part time students complete around 80% of the credit hours attempted.
- ❖ Full time students at John Logan (95%), Kankakee (90%), and Lake Land (91%) complete 90% or more of their attempted credit hours.
- ❖ Part time students at John Logan (89%), Lake Land (85%) and Lewis & Clark (82%) complete 82% or more of their attempted credit hours.
- ❖ DOC and dual credit students are included in these analyses. Since the vast majority of these students are part time, they would be included in the part time course completion analyses.
